Description

The Monitoring screen will let the user monitor the items that exist in CO-OPs database, Map Items, build Comparison Items table manually and save it for later use, send inspection orders, Edit Profit Margin and using the following search criteria:
1.   Search by Barcode: The system display the Item has the barcode inserted.
2.   Search by Item Name: The system will display all items related or close to the inserted text.
And the following Filters:
3.   City: The system will display all cooperatives related to the city selected and the user is able to add more cooperative.
4.   Category: The system will display all items related to the category selected.
5.   Cooperatives Selection: The user could determine the selected cooperatives for Search or filtered result on items.
6.   Supplier: The system will display all the items that have been supplied by the supplier, if the supplier have similar specs in different cooperative.
And the following Search option:
1.   Normal search will display all items based on the search criteria inserted.
Profit Margin Search will display all items selling with profit margin more than the expected based on MOSA Law.
