Step_Description:			**URL:**	
Pre_Conditions:			**Test Case ID:**	
Expected Result:	the item should be returned in the search result with it's name as the defined item,			

Description

Search by section in item General details screen is not functioning correctly

Steps to duplicate:
1- create new section called "test section"
2- create a new defined item and link it to the test section
3- link an item to the defined item
4- go to item General details screen and search fro the linked item by the section name created

the item should be returned in the search result with it's name as the defined item,
meanwhile it's not retrieved and the search result shows No items

its work fine

#4 - 08/31/2019 10:56 PM - Israa Naser

- Assignee changed from Israa Naser to Abed Abuhalawa

- Co-Workers Israa Naser added

Abed could you please re-check this on,
searching by providers on this screen, actually searches for the COOP item barcode not the defined item barcode
so No data is retrieved

Also, when there is no results for the data searched by in a certain date, the fields are displayed empty
instead the No-data found message should be displayed

- Status changed from Fixed to Closed

- % Done changed from 0 to 100

- Browser Firefox added

Covered in SRS under
4.8   Use Cases

Tested and verified the following:
1- Defined item barcode > matching & not matching the mapped item
2- Different dates for the defined item entry > search with the date that has data values and date that has no values
3- Search by providers using dates that have data values and dates that don't
4- Search by sections using dates that have data values and dates that don't
5- Search for an empty defined item, empty section, empty providers don't show in the suggested list

#8 - 09/02/2019 02:06 PM - Israa Naser

and regarding the empty fields displayed in the section,
this has been moved to Bug #1731 linked in the related issues
