Step\_Description: Test Case ID:

### **Description**

the fields is Prince monitoring cache the values in some scenarios as follows:

Scenario #1 Caching the values in fields when navigating from one screen to another Steps to duplicate:

- 1- go to screen 00000 0000 000000, select to search by sections
- 2- select section and subsection and item in the fields
- > the fields are expected to be empty, but they are populated with the values from the previous screen

-----

Scenario #2 Caching values for the same screen when navigating back and forth to it Steps to duplicate:

- 1- go to screen 00000 00000 0000 0000 0000 0000, select to search by sections
- 2- select section and subsection and item in the fields
- 3- navigate to 000000 000000 screen, then go back to screen 00000 0000 0000 0000 0000 0000
- 4- switch searching type to be search by sections,
- > the fields are expected to be reset to empty, but they are populated with the values from the previous screen
