Dear Zaid Please consider these issues and concerns.

1- "News Details" Page is not implemented yet
2- Removing the "More" menu
The content of the More menu is not following the users permission to be available or not available.
The main actions that exists in the More menu already exists in the summary page "Approve, Reject"
3- Replace the More action with "Delete" Action
4- Update the Requirements table in the FRD to add a new column "Field Type" to take the values "Read only, Hidden and Edit"
5- Update the screenshots to remove the "More" action and replace it with "Delete"
6- List Search
7- when browsing for an image in the site studio contributor is only shows the Images that is located under the news category.
8- switch the pop-up from the regular view to the simple view (no extra features included)

Sa'ed please let us discuss the Sorting technique in the system
- it is only sorting the data descending
- no reset action for the sorting
- sorting is not functioning well !
