Step_Description:		**URL:**	
Pre_Conditions:		**Test Case ID:**	
Expected Result:	the item is expected to be deleted, and removed from the table		

Description

if the defined item is linked to a provider, it's not deleted from the table when the user clicks the delete action

Steps to duplicate:
1- create a new defined item and link it to a COOP item,
2- create a new provider and add the coop item to it
3- go back to the defined items screen and try to delete the linked item
4- check that the delete warning is displayed, and click Ok to delete
5- check the linked items table

the item is expected to be deleted, and removed from the table
meanwhile it's still present in the linked items table
