Category:	Price monitoring module	**Transaction Number:**	
Sub-Category:	Item Price Average within Period (□□□□□ □□□□□ □□□ □□□ □□□□□□□□)	**Browser:**	Chrome
Step_Description:		**URL:**	
Pre_Conditions:		**Test Case ID:**	
Expected Result:	the screen is expected to return search results with the items linked to the defined item		

Description

When the user searches for a defined barcode that is linked to items with different barcodes,
the screens returns No data found.

Steps to duplicate:
1- define a regular item and link it to many items from COOPs with different barcodes
2- Go to price average screen and search fro the item defined using the General barcode set in the defined item

the screen is expected to return search results with the items linked to the defined item
but the screen shows that No data found

the same search method is used in searching by barcode, providers and sections

Requirement for this in SRS under
6.8   Use Cases

Tested and verified the following:
1- Search for items with barcode different from the defined item barcode
2- Search for items with barcode identical to the defined item barcode
3- Search using dates that has no data entered
4- Search in COOP's that are not among the defined item COOP's list
5- Search within a period that has only one entry data
6- Search using providers linked items , empty providers are not displayed in the options
7- Search in an empty section or item with no barcode, shows the message of (No data found)
