- Assignee changed from Zaid Shakboua to Saja Nakhleh

Issue #1: Fixed, there is not OOTB solution to translate the element titles in Site Studion, instead, i literally translated the titles using javascript as a workaround.

Issue #2: Fixed, this is a system control that the contributor do NOT need or use, i hide this control field.

Issue #3 + Issue #4: Pending, the displayed in the attached screenshot(s) is English is the actual workflow and workflow step names. i'll add a localized description to be displayed instead of the actual name (the workflow and workflow step names cannot be localized). this requires me to update all of the workflows in the system and this need more time.
NOTE: This is not a part of this task, it will be better if you open a new task for this issue.

Issue #5: Pending, the page in the attached screenshot is the system global error message page, i could not pass the locale as parameter to this page but i'll try some other solutions. expected to be ready this week.

Issue #6: Fixed, this is a system control that the contributor do NOT need or use, i hide this control field.
Just to make sure we are the same page, the same will happen for any content type not only for Video type, right?

#12 - 04/01/2021 12:50 AM - Zaid Shakboua

Issue #5: Fixed, the creation screen will not proceed on error thus no error message (correct/incorrect translate) is displayed.
