#3 - 04/13/2021 11:46 AM - Rahaf Khashroom

- Status changed from Feedback to Fixed

- Assignee changed from Rahaf Khashroom to Saja Nakhleh

Issue #1:
A : Fixed, the serial number is mandatory now and social status is disabled and filled from "PACI" service.
also as requested from Mohannad the tabs in the page will be disabled until the serial number filled and the data returned from "PACI" service then all tabs will be enabled.

B. As discussed with Mohannad , the area field still disabled and it's value will be filled based on a comparison between the areas belonging to the selected unit and the areas retrieved from "PACI" service ,   if no matching is found between the areas, then the value will be "العنوان غير مطابق" .

Issue #2: Fixed , as Mohannad mentioned above ; when the case is changed a message should be shown to the user that all attachment will be removed and once the user confirm the message all attachment will be removed and in case the user cancel it nothing will happen.

- Also I've added new validations on the Pages :
  A) Values of the Case,Unit and region inside the decision must match the selected values in the page.
  B) When a serial number of deceased person is entered , an error message will be shown and the submit button will be disabled.

new issue , issue #3 (Newly added enhancements)
the researcher decision text box will keep the original decision, hence the comparison will not applied on it
Kindly observe evidence 9.gif (task #149667 , user 135)

Issue #4:
once the user changes the unit then he selects ☐☐☐ ☐☐ ☐☐☐☐☐ ☐☐☐☐☐ * ☐☐☐ ☐☐☐ ☐☐☐☐ **,
then no validation will be handled on this case ! (needs business review with Musab and Muhannad)

Saja:
a show stopper prevents test the enhancement on the change file form (http://mscjo.dynalias.com:8089/redmine/issues/2370), issue #7

#9 - 06/17/2021 02:03 PM - Saja Nakhleh

- Status changed from Feedback to Closed

based on the bug report #2370, the enhancement could not be tested as the change file data couldn't applied for the dead beneficiary
and the beneficiary data could not edited to using while testing as this data is called every time from PACI
