Please notes that Service No. 4 update work Eaz is temporary stop and we can't get a complete success scenario because of invalid CIVIL_ID for all employees,
we have tried to get data for any employee in more than one company and always returns null values and there is no way to pass the validation.

After trying to resolve the problem with Abdelhalim we have discovered that all data have been inserted in JAN/2016 with new EAZ_RECID and the old EAZ_RCIDs does not match any data.
Waiting for response as soon as possible.
