Saja, i try to replicate the issue as you did but its not happening now.
Check trx which i have submitted 3082017000193726.
Please if its still happening, please try to attach me video clip that how you are still generating it.

I found that this is happening because of the following Question ..

- Do you have a Commercial/Industrial plot? Either Granted or Owned?*

In this question, property number was not restricted to any number of characters and in database the value was only 20 characters.
As i found that it is an existing issue in this form.

However, its valid and proper issue which i fixed and restrict the property no. to 15 characters which is normally we do in other forms as well.
