Saja, I try to submit add land trx and its submitting without any errors. Can you please send me the video that how you are generating this error ? Please check image i added for submitted trx # 3062017000195031.

For owner sequence, there is no issue in changing the sequence of owners as this has no significance in business and we are not marking any sequence for them. So oracle db is returning the records with its own management. So no need to cater this issue.
